Singapore 575625

Dear Florence,

### LETTER OF COMMENDATION

We would like to extend our commendation to CAD-IT Consultants (Asia) Pte Ltd for supporting the ANSYS (AQWA) solutions to ABS Pacific SED – Offshore Structures & Statutes.

ANSYS AQWA Suite is user-friendly hydrodynamic solution, especially integrated with Work Bench to allow us to effectively interact with AQWA in graphic interfaces, easily carry time domain analysis on basis of results from hydrodynamic Diffraction, as well as do structural checking by mapping loads to ANSYS Mechanical in a very effective way. This has greatly facilitated our department in building our strength in the advanced analysis area.

Over the months, you and your team have demonstrated very professional delivery on closing technical issues raised. This in part was due to your competent and capable technical support team. Their responsiveness and eagerness are very much appreciated.

Thanks Again!

Yours Sincerely  
ABS – Singapore
