Attn: Mr. Terence Chan
Managing Director
CAD-IT Consultant
Singapore

Dear Mr. Terence Chan

Asian Institute of Technology Microelectronics program has acquired the ANSYS Multi Physics FEA in 2001 as software of choice to teach our graduate students finite element analysis and to use it also in their research projects. I am very happy to get this tool as it has offered our students the ability to learn and perform the complex FEA operations in a relatively small time frame.

We would like to commend the good service and support provided by CAD-IT. We look forward to working more closely with CAD-IT for our future educational software needs.

Thank you very much.

Dr Nitin Afzulpurkar
Associate professor
Industrial Systems Engineering and Microelectronics Program Coordinator
